

Notices

Federal Register

Vol. 63, No. 143

Monday, July 27, 1998

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Intent To Grant Exclusive License; Correction Notice

AGENCY: Agricultural Research Service, USDA.

ACTION: Correction to notice of intent to grant exclusive license.

SUMMARY: In notice document published in the issue of Monday, July 13, 1998, (63 FR 37512) the Serial No. 07/550,310 was erroneous. This notice corrects the exclusive grant license to Satake USA Inc., of Modesto, California, as follows:

On page 37512, in the second column, first paragraph of the USDA notice, the Serial No. was incorrect. The correct Serial No. is 08/550,310.

Richard M. Parry, Jr.,
Assistant Administrator.

BILLING CODE 3410-03-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 98-071-1]

Availability of Environmental Assessments and Findings of No Significant Impact

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that four environmental assessments and findings of no significant impact have been prepared by the Animal and Plant Health Inspection Service relative to the issuance of permits to allow the field testing of genetically engineered organisms. The environmental assessments provide a basis for our conclusion that the field testing of the genetically engineered organisms will not present a risk of introducing or disseminating a plant pest and will not have a significant impact on the quality of the human environment. Based on its findings of no significant impact, the Animal and Plant Health Inspection Service has determined that environmental impact statements need not be prepared for these field tests.

ADDRESSES: Copies of the environmental assessments and findings of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect those documents are requested to telephone before visiting on (202) 690-2817 to facilitate entry into the reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Assistant Director, Scientific Services, PPQ, APHIS, Suite 5B05, 4700 River Road Unit 147, Riverdale, MD 20737-1237; (301) 734-7710. For copies of the environmental assessments and findings of no significant impact, contact Ms. Linda Lightle at (301) 734-8231; e-mail: Linda.Lightle@usda.gov. Please refer to the permit numbers listed below when ordering the documents.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340 (referred

to below as the regulations) regulate the introduction (importation, interstate movement, and release into the environment) of genetically engineered organisms and products that are plant pests or that there is reason to believe are plant pests (regulated articles). A permit must be obtained or a notification acknowledged before a regulated article may be introduced into the United States. The regulations set forth the permit application requirements and the notification procedures for the importation, interstate movement, and release into the environment of a regulated article.

In the course of reviewing each permit application, the Animal and Plant Health Inspection Service (APHIS) assessed the impact on the environment that releasing the organisms under the conditions described in the permit application would have. APHIS has issued permits for the field testing of the organisms listed below after concluding that the organisms will not present a risk of plant pest introduction or dissemination and will not have a significant impact on the quality of the human environment. The environmental assessments and findings of no significant impact, which are based on data submitted by the applicant and on a review of other relevant literature, provide the public with documentation of APHIS' review and analysis of the environmental impacts associated with conducting the field tests.

Environmental assessments and findings of no significant impact have been prepared by APHIS relative to the issuance of permits to allow the field testing of the following genetically engineered organisms:

Permit No.	Permittee	Date issued	Organisms	Field test location
98-117-03r	Limagrain Genetics Research.	6-10-98	Corn genetically engineered to express the human serum albumin protein.	Illinois, Iowa.
98-117-04r	Limagrain Genetics Research.	6-12-98	Corn genetically engineered to express the rabies virus G glycoprotein.	Indiana.
98-117-01r	Limagrain Genetics Research.	6-12-98	Corn genetically engineered to express human hemoglobin protein chains.	Illinois.
98-117-02r	Limagrain Genetics Research.	6-12-98	Corn genetically engineered to express a human procollagen type chain protein.	Indiana.
